TRAINING · WEEK 1

Understand UNIUI.

Get the idea clear enough to explain it in your own words.

UNIUI DOC 04 FIELD GUIDE

01 / WHAT IS UNIUI?

An AI academic platform for Nigerian university students.

UNIUI is designed to help students ask academic questions, work with course materials and study with more context. The core idea in one line: course-grounded learning, built for Nigerian campuses.

KEY POINT

Say it naturally

"UNIUI helps me work through academic questions with my course context in view." Use wording that reflects your own experience; do not imply every feature or release is available today.

02 / THE STUDENT PROBLEM

FRAGMENTED SEARCH

Answers take time to find

Students can spend hours searching across chats, folders and general web results.

SCATTERED MATERIAL

Past questions get scattered

Useful papers and notes can be buried in shared files or hard-to-search folders.

MISSING CONTEXT

Generic help lacks context

A broad answer may not reflect a student's course materials or semester.

03 / HOW UNIUI IS DESIGNED TO HELP

LEARN

Ask

Ask an academic question in the context of the material available to you.

VERIFY

Check the source

Review cited source material and confidence cues where the product provides them.

ORGANIZE

Find course material

Use course notes and past-question resources where available.

PRACTISE

Build a routine

Use study routines or streak features only where available in the current release.

04 / FEATURE TOUR

Four illustrative concepts. Verify the live product before you post.

The panels below are concept mockups based on the supplied program brief—not product screenshots. Availability, labels and release status must be checked against the current UNIUI product.

01 · ASK

Ask a question

COURSE CONTEXT · BIO 201

“Help me understand today’s lecture.”

Add your own question before asking.

02 · CHECK

Answer with sources

ANSWER CONFIDENCE · REVIEW

Source: uploaded lecture notes, section 3.

Open the source and check the fit.

03 · FIND

Past questions

COURSE · BIO 201

Topic: Cell biology · Year: 2024

Filter course material where available.

04 · PRACTISE

Study routine

STUDY ROUTINE · CONCEPT

A short review session for today.

Streak and reward details depend on release.

KEY POINT

Your first task

Sign up for UNIUI if access is available. Ask three genuine academic questions. Save a screenshot only if the product and your account permit it; remove private information before sharing. Post in the group: **“This is what I found.”**

WEEK 1 / CREATOR CHECKLIST

Learn first. Then explain what you actually saw.

UNDERSTAND

Before you talk about it

- [ ] I can explain what UNIUI is in one sentence.
- [ ] I know which features I personally tried.
- [ ] I can distinguish available features from concepts or planned features.

EXPERIENCE

When you try UNIUI

- [ ] Ask three real academic questions.
- [ ] Check any source shown against the answer.
- [ ] Note what was clear, useful, uncertain or missing.

SHARE

Before sharing

- [ ] Remove names, student IDs and private course content.
- [ ] Label concept visuals as illustrative.
- [ ] Disclose that you are a UNIUI creator.

GROUP POST PROMPT

KEY POINT

Use your own words

“I tried UNIUI for [course/topic]. I asked [general question]. What stood out was [your honest observation]. I’m a UNIUI creator, and this is my experience.”

Do not post grades, private student data, unpublished exam material or screenshots that expose another person’s information.
