TRAINING · WEEK 2

Show the product honestly.

Make the value visible in under 60 seconds.

UNIUI DOC 05 FIELD GUIDE

01 / CHOOSE A DEMO FORMAT

Pick the format that feels natural to you.

FORMAT 01

Screen recording + voiceover

Capture the relevant product flow, then narrate what you tried and what you noticed. Keep the screen legible and hide private details.

FORMAT 02

Face-to-camera + screen

Open with your real question or reaction, then show the relevant screen. Make clear what you personally tested.

FORMAT 03

Text overlay + screen

Use a short on-screen question or observation, then show the flow. Keep every claim accurate and readable.

KEY POINT

The standard

A good demo helps another student understand one thing UNIUI can do. It does not promise grades, replace learning, or pretend a planned feature is already live.

02 / BUILD A CLEAR 60-SECOND DEMO

A simple rhythm, not a script.

OPEN — 0–5 sec

The hook

Name a real course question, study moment or curiosity. Avoid exaggerated “miracle” language.

CONTEXT — 5–15 sec

The context

Say what you are testing and why it matters to your study session.

DEMO — 15–40 sec

The product

Show the actual flow you used. Pause on the answer and any source or confidence cue that is genuinely available.

REACT — 40–52 sec

Your reaction

Share one honest observation: useful, surprising, unclear or something you would double-check.

DISCLOSE — 52–60 sec

Close

Invite viewers to learn more; disclose your creator relationship and use the approved tag.

HOOKS TO ADAPT

HOOK

“I asked UNIUI my hardest question…”

Only use if it truly was a challenging question for your course.

HOOK

“Can AI actually answer this?”

Show what happened, including uncertainty or a limitation.

HOOK

“Testing this AI on my coursework”

Do not show private assignment instructions or submit AI output as your own work.

HOOK

“Three things UNIUI got right that I didn’t expect”

Keep each point specific to your actual test.

HOOK

“If you’re a [course] student, watch this”

Use a course-relevant question and avoid implying official school endorsement.

03 / QUALITY CHECK + YOUR TASK

One real question. One clear demonstration. Your honest point of view.

PREP

Before you record

- [ ] Choose a real question you are comfortable sharing.
- [ ] Check whether the product is available and the feature is live.
- [ ] Use your own account; remove personal or confidential data.
- [ ] Record in a quiet, well-lit place with clear audio.

CAPTURE

While you record

- [ ] Keep the key screen visible and readable.
- [ ] React naturally; do not manufacture surprise.
- [ ] Show sources or confidence cues only if they appear in your actual session.
- [ ] Keep the final cut under 60 seconds.

REVIEW

Before you send

- [ ] Check every factual claim against the product.
- [ ] Add “I’m a UNIUI creator” or #UniUICreator.
- [ ] Tag @UniUI where appropriate.
- [ ] Ask the group if anything feels uncertain.

KEY POINT

Your Week 2 task

Record one demo video and post it in the creator group for feedback. Include: the question you tested, what happened, one genuine reaction, and your disclosure. Feedback is for improvement—not a requirement to publish every draft.

> Never frame UniUI as doing a student’s assignment. Follow your institution’s academic-integrity rules.
