TRAINING · WEEK 3

Prepare content that feels real.

Campaigns give you a direction, not a script.

UNIUI DOC 06 FIELD GUIDE

THE CAMPAIGN PRINCIPLE

Start with a useful idea. Tell it in your own voice.

Choose a campaign angle that fits your course and your real experience. Make the post useful to another student, show only what you have actually tested, and disclose your creator relationship.

CAMPAIGN 01

Meet UNIUI

Introduce the platform: what it is, who it is designed for and why you chose to try it.
Idea prompts: “One study problem I want to make easier”; “What course-grounded AI means to me”; “My first impression after trying it.”

CAMPAIGN 02

Test UNIUI

Ask UNIUI a difficult academic question, show the actual answer and share your honest reaction.
Idea prompts: one concept from a real lecture; a question with a checkable source; what you would verify next.

CAMPAIGN 03

Can AI get this right?

Explore how confidence cues and sources help you judge an answer. Show both what seems supported and what remains uncertain.
Idea prompts: source check; compare with your notes; show a limitation honestly.

CAMPAIGNS / CONTINUED

Document real use. Invite useful participation.

CAMPAIGN 04

My semester with UNIUI

Document real use over time rather than presenting one interaction as proof of results.
Idea prompts: a weekly study check-in; what changed in your workflow; one thing you still verify manually.

CAMPAIGN 05

UNIUI Challenge

Create the most useful academic demonstration you can. Keep it fair, course-specific and grounded in real product behaviour.
Idea prompts: explain a tricky idea; make a short source-check walkthrough; invite peers to suggest a question.

CAMPAIGN BRIEF · FILL BEFORE RECORDING

MY AUDIENCE

Which students or course cohort will find this useful?

MY POINT

What is the one thing a viewer should understand or learn?

MY PROOF

What real product interaction, source or personal observation supports it?

MY BOUNDARY

What should I avoid claiming, showing or exposing?

CONTENT RULES

Trust is the campaign. Protect it in every post.

DO

Use your own voice

Campaigns are prompts, not scripts. Do not copy a testimonial or claim that does not match your experience.

DO

Disclose clearly

Every post must include “I’m a UNIUI creator” or #UniUICreator. Tag @UniUI where appropriate.

DO

Show what is real

Only demonstrate features available to you. Label concept visuals as illustrative and do not present them as a live product screen.

DO

Keep academic integrity

Do not say UniUI guarantees grades or does assignments. Do not share confidential assessment material.

DO

Respect people and schools

Get permission before showing other people. Avoid implying official university endorsement unless approved.

DO

Be constructive

No competitor claims, fake engagement, spam or fabricated results. Ask the team if a claim is unclear.

YOUR WEEK 3 TASK

Choose and plan

Pick two campaigns. Draft three video ideas for each (six ideas total). For every idea, include the audience, the one-sentence point, the real proof you will show, and your disclosure. Post your ideas in the group for feedback.

IDEA WORKSHEET

Six starting points for your own concepts.
