

RECRUITMENT · PROGRAM OVERVIEW · DOC 02

Creator Program Overview

A student creator opportunity built around real campus voices and useful academic content.

Create. Share.
Refer. Earn.

Pre-launch. Program details may be updated. Earnings are conditional on qualifying activity and on the Creator Program Terms. This document is a plain-language summary, not legal advice.

01

What this is

A pre-launch network of Nigerian student creators building with UNIUI. You do not need a large following. You need to be a student who creates content, shares useful ideas and can speak in your own voice. The program combines practical creator training with performance-based earnings.

NOT THIS**It is not an ambassador role**

Ambassadors earn for recruiting effort on campus. Creators earn for audience reach. If you fit both, you choose one — the two never stack.

NOT THIS**It is not a multi-level scheme**

There is no downline and no override. A creator who refers another creator earns a one-time bonus. It does not compound.

NOT THIS**It is not a contract**

No minimum term. No exclusivity. You may leave at any time and still collect qualifying commissions already earned.

What you get

- A unique referral link for launch attribution, plus a dashboard showing clicks, signups, activated users and earnings.
- 2.5% added to every commission rate for the first 20 approved creators, permanently.
- 6 months of recurring commission on every subscriber you bring, not a one-off payment.
- Exclusive campaigns and early access to V2 before the public launch.
- A creator WhatsApp community and a feedback council for the top performers.
- Content resources: logos, screenshots, demo videos, hooks and campaign briefs.

What you build

SKILL**Demonstration**

Confidence showing an academic product honestly, including where it falls short.

SKILL**A portfolio**

A body of useful, credible content you keep after the program ends.

SKILL**A peer network**

Working creators across Nigerian campuses, and a direct line to the product team.

02

How you are paid

Commission is a percentage of what a subscriber pays, not a flat fee. It scales automatically with the number of paying subscribers you bring, so the same content earns more as your audience converts.

Per subscriber who pays for the ₦2,500.00 Scholar subscription. The final column is what a founding creator earns on the same subscriber.

TIER	SUBSCRIBERS	PER SUBSCRIBER	TOTAL	FOUNDING (+2.5%)
Starter	0-9	₦250.00 + ₦125.00×6	₦1,000.00	₦1,437.50
Growing	10-49	₦312.50 + ₦187.50×6	₦1,437.50	₦1,875.00
Established	50-199	₦375.00 + ₦250.00×6	₦1,875.00	₦2,312.50
Top	200+	₦500.00 + ₦250.00×6	₦2,000.00	₦2,437.50

WHY THIS STAYS AFFORDABLE

At the top tier you pay 6.7% of a subscriber's lifetime value, and a founding creator takes it to 8.1%. On a ₦30,000.00 lifetime value that is cheaper than the ₦3,000-₦8,000 a paid ad costs to acquire the same student, and it lands with someone they already trust.

The one product with a cap

₦10,000.00 Deep Study is a one-time purchase, not a subscription, so it earns no recurring commission. Its commission is capped at ₦500.00 so a single sale can never consume the margin on that product.

03

How the programme works

You do not wait for the product. The network launches now and your link is issued at approval. V2 arrives later, into an audience you have already built.

01 • Apply **Submit the creator application.**

Tell us who you are, what you post, and how you would introduce the network to your audience.

02 • Get approval **Receive confirmation and next steps.**

We review every application within 48 hours against the vetting criteria, and tell you either way.

03 • Join the network **Meet the network.**

Get access to resources, campaign updates and direct support from the team.

04 • Get your link **Issued at approval, not at launch.**

Your referral slug and dashboard go live immediately. This is the single most important difference from a product launch programme.

05 • Build your identity **Identify, demonstrate, build.**

Set up your creator identity, practise a demonstration, and start publishing network content. You are posting throughout, not after.

06 • Keep growing **Ongoing network growth.**

Study tips, campus content, creator life. When V2 launches you accelerate into an audience that already trusts you.

WHY THE IMMEDIATE START MATTERS

A network that only begins at launch starts cold. A network that has been running for six weeks launches warm. By V2 you should have an audience, a backlog of content and momentum — so launch becomes a spike rather than a start.

The six-week runway**WEEK 1
IDENTIFY**

Onboard, understand the network, set up your profile. Publish your introduction post.

**WEEK 2
LEARN THE TOOLS**

Test your dashboard, meet the other creators. Publish behind-the-scenes content.

**WEEK 3
BUILD**

Start network-building content. Publish “join my network” posts carrying your slug.

**WEEK 4
FIRST CAMPAIGN**

Publish “the problem I am solving for students”.

**WEEK 5+
KEEP GOING**

Study tips, campus content, creator life — your normal content, affiliated.

**AT V2
ACTIVATE**

Coordinated launch content into a warm audience.

04**What you post before the product exists**

Six content pillars that need no product, no demo and no pitch. The rule underneath them is simple and it is the whole strategy.

**PILLAR
The Journey**

“Day 1 as a Founding Creator.” Builds your brand and makes the network visible.

**PILLAR
The Problem**

“Why studying in Nigeria is broken.” Sets up the solution without ever pitching it.

**PILLAR
The Build**

“What I am building with 500 other creators.” Creates anticipation and momentum.

PILLAR**The Tips**

"3 study hacks I actually use." Your normal content, with a subtle affiliation.

PILLAR**The Network**

"Meet the other Founding Creators." Cross-promotion and community growth.

PILLAR**The Countdown**

"Something is coming. Here is what I know." Anticipation and exclusivity.

THE RULE

Never pitch the product before it exists. Pitch the journey, the problem and your own story. When V2 lands, you pivot to product content into an audience that already trusts you.

THE METRIC THAT MATTERS

Not how many creators post on launch day. How large the network's combined audience is by launch day. Five hundred creators averaging 1,000 engaged followers is a warm audience of 500,000 — and that is the asset.

05

Founding spots are tiered by order of entry

All 500 founding creators hold permanent numbered status. The earlier cohorts carry a larger cash bundle.

COHORT	SPOTS	CUMULATIVE	CASH BUNDLE EACH	WHAT IT CARRIES
Founding 20	20	first 20	₦12,450.00	Includes the permanent +2.5% commission bump
Founding 100	80	first 100	₦4,000.00	Creator access, currency, status
Founding 500	400	first 500	₦1,200.00	Creator access, currency, status

Referral bonuses across the network add ₦575,000.00, bringing the total cash cost of the full network to ₦1,624,000.00. Commission rates are identical across all cohorts except the first twenty.

06

Who this is for

We select on audience relevance and genuine engagement, not follower count. A student with 2,000 real campus followers is worth more to this programme than an account with 30,000 people who will never buy an academic tool.

CRITERION
Nigerian student

You attend a Nigerian university or polytechnic.

CRITERION
Actively posting

You have posted on TikTok or Instagram in the last 14 days.

CRITERION
Relevant content

Study, campus life, exam prep, tech or lifestyle.

CRITERION
Genuine engagement

Real comments and replies, not just likes. Comments are the signal we look for first.

CRITERION
Micro or nano

Between 500 and 5,000 followers is the target band.

CRITERION
Reliable cadence

Willing to post at least twice a week during active campaigns.

HOW SELECTION WORKS

Four or more yeses is an approval. Two or fewer is a decline. Three is held for review, and we will tell you which criterion was unclear. We review every application within 48 hours either way — you will not be left guessing.

READY TO APPLY?

Apply at waitlist.uniui.com.ng/creators. Referral attribution, eligibility and payment details are governed by the separate Creator Program Terms.

Program details are pre-launch and may be updated. Earnings are conditional on qualifying activity and on the Creator Program Terms.
